<b>I. Project Summary</b>
<b>Legal Name of Applicant:</b> Plainville Fire Department
<b>Project Name (Please limit to 5 words):</b> Electric Vehicle Fire Blanket
<b>Amount Requested:</b> \$13,180.00
<b>Brief Project Description (approx. 50 words):</b>
The Plainville Fire Department is requesting funds for 4 electric vehicle fire blankets. There are multiple electric vehicle charging stations located on the second floor of the parking garage at Plainridge Park Casino. Vehicle fires in and of themselves can be relatively benign but when it involves an electric vehicle, they can quickly become significant. The electric vehicle fire blanket stays on the vehicle smothering the flames and is resistant to extreme temperatures. The purpose of the blanket is to quickly extinguish and contain the fire while no water is used to eliminate run-off and creating a negative impact to the environment. These blankets would allow crews to contain an electric vehicle fire once quickly, effectively and safely on scene and minimize damage to surrounding vehicles and the structure itself.

**III. Detailed Project Description & Mitigation**

1) Please describe in detail the impact that is attributed to the operation of a gaming facility. Please provide documentation or evidence that gives support for the determination that the operation of the gaming facility caused or is causing the impact (i.e. surveys, data, reports).

There are multiple electric vehicle charging stations located on the second floor of the parking garage at Plainridge Park Casino, approximately 17 of them. Vehicle fires in and of themselves can be relatively benign but when it involves an electric vehicle, they can quickly become significant. Electric vehicle fires once they involve the batteries can be extremely dangerous and burn at temperatures that can exceed 4,900 degrees. Once the batteries are involved it will take anywhere from 20,000 to 30,000 gallons of water to adequately cool them and keep them from re-igniting. The electric vehicle fire blanket stays on the vehicle smothering the flames and is resistant to extreme temperatures. The purpose of the blanket is to quickly extinguish and contain the fire while no water is used to eliminate run-off and creating a negative impact to the environment. The 4 blankets will be placed on key vehicles throughout the department, 1 on the front-line engine, 1 on the tower, 1 on the back up engine and 1 on the squad which was purchased to be able to access the parking garage at Plainridge Park Casino. The department feels there is a need for these blankets as the casino's parking garage has the largest bank on electric vehicle chargers at approximately 17 spots. These blankets would allow crews to contain an electric vehicle fire once quickly, effectively and safely on scene and minimize damage to surrounding vehicles and the structure itself.

2) *(If applicable)* Please explain how this impact was not anticipated in the Applicant's Host or Surrounding Community Agreement.

3) Please describe what the Applicant is proposing and how the mitigation request will address the impact indicated.
